The Department offers the Master of Science degree in Mechanical or Aerospace Engineering without thesis. The quantitative requirement for the degree is 30-credit hours (normally 10 courses) completed with a grade-point average of 2.7 or better. Course programs may be composed from one area of specialization below (MSME) or in aerospace engineering (MSAE). They must conform to the following distribution:

- Applied Mathematics: 6 credits
- Area of Specialization: 15 credits
- Electives: 9 credits

Elective courses may be chosen in any area of engineering or mathematics at 400-level or higher. Of the 30 units, a minimum of 24 must be in 500-level courses. No more than 6 units may be in 400-level courses; core requirements for the ME undergraduate degree are not allowed. A maximum of 3 credits of Independent Study, MEMS 400/500, may be included as an elective course. A minimum of 15 units must be in MEMS. Non-engineering courses (such as T-courses or finance and entrepreneurship) cannot be counted as engineering electives. Full-time MS students in any area are required to take MEMS 501 Seminar every semester, which is a zero-unit pass-fail course.

Degree candidates will plan their course programs with the help of a departmental advisor. Given below are partial listings of courses recommended for satisfaction of distribution requirements in mathematics and each of the available areas of specialization.
